

Plants available from the Salish Seeds Project

The Salish Seeds Project primarily grows plants by advance order. Surplus plants are also occasionally available – it never hurts to ask. In addition, a selection of species in 4” pots are offered to the public annually at fall plant sale events on Orcas, Lopez, and San Juan Islands.

Orders for species marked with an asterisk should be placed by October 31 for delivery the following summer or fall. Other species can be ordered by March 31 for delivery that same summer or fall. Please note minimum order quantities.

To place an advance order or inquire about surplus, contact Eliza Habegger at the San Juan County Land Bank (elizah@sjclandbank.com; 360-370-7653) regarding species and quantities desired. Don't hesitate to ask if you're looking for something that's not on the list below, need assistance planning your native plant project, or have any related questions.

Thank you for helping conserve and restore the wildflowers of the Salish Sea!
